**INNOVATION.  
QUALITY.  
PEACE OF MIND.**

**Play-Safe System** | Safety driven by science brings together a turn-key solution. After all, your name and reputation is on the project. Ours is too.

# THE RIGHT SOLUTION. THE RIGHT PARTNER.

A FieldTurf playground is safer, cleaner and more comfortable than natural sod or any other artificial grass on the market.

## Benefits:

- Cushioned, soft surface comforts falls
- No chemicals necessary for cleanup
- Lowest maintenance requirement of any play surface
- Year-round availability in all climates, excellent drainage, allows for immediate play after rain
- Fertilizer and pesticide-free, no mud & grass stains
- Unmatched organic sod look & feel
- World class service

## Ideal For:

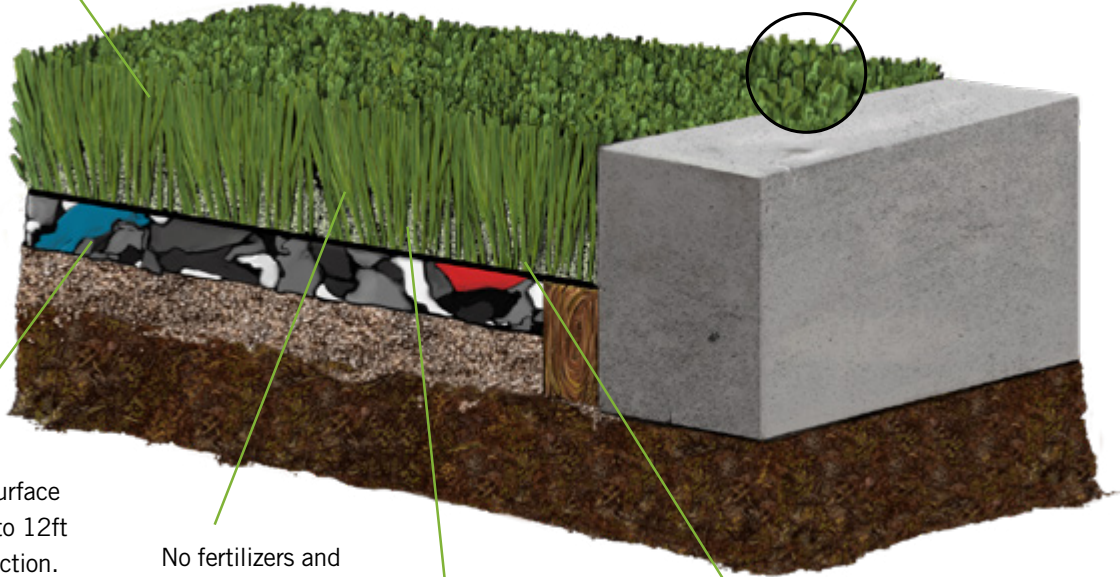

- Hard to maintain areas
- Multi-use play areas
- Shaded & low light areas
- Poor draining areas
- Water conscious landscape
- “Green” landscape design
- LEED credit qualifying
- Green roof play areas

## Play-Safe System

Soft-touch fibers eliminate friction burns.

Supremely soft, taller yarn intertwines with shorter curled blades to replicate a natural look & feel.

Cushioned surface provides up to 12ft impact protection.

No fertilizers and pesticides needed.

No deodorizers or additives needed.

Advanced drainage technology increases traction during rainfall.

## Play-Safe System

FieldTurf's Play-Safe System provides a consistent Critical Fall Height rating for up to eight years and combines the benefits of artificial grass with the additional safety of a playground shock pad. FieldTurf's IPEMA certified products are able to meet the ASTM 1292 Critical Fall Height requirements for up to 12 feet and meet all ASTM 1951 ADA certification requirements.

**Only manufacturer to offer an 8 year Critical Fall Height Warranty**

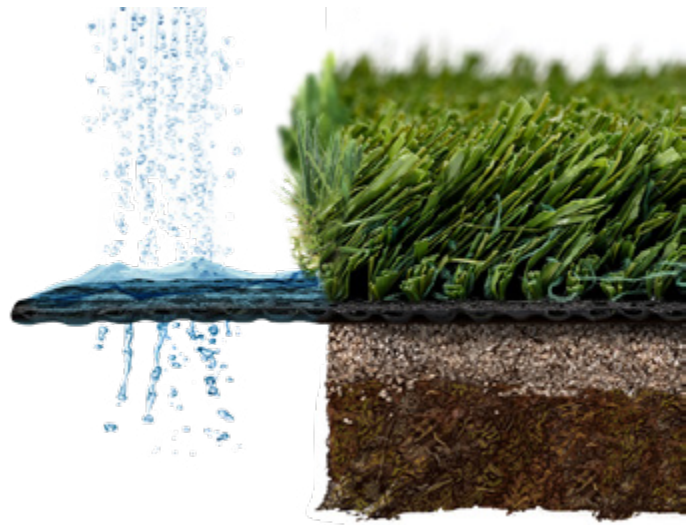

# SUPERIOR DRAINAGE MEANS MORE TIME TO PLAY.

Only FieldTurf has a proprietary 100% permeable, nonabsorbent backing that drains faster than real grass and better than any other artificial grass surface available. Other turf backings with hole-punched or felt backing can't effectively drain quickly leading to odor, bacteria buildup, as well as the potential for standing water areas.

## MAXYFLOW

The difference is in  
the drainage!

MaxFlow™ proprietary drainage technology is the only 100% permeable turf backing, allowing liquids to drain freely, making it ideal for use in wet areas.

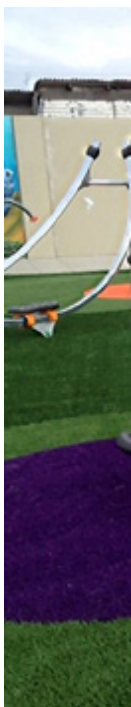

Increase Play Time With All-Weather Drainage

**Advanced polymer engineering enables FieldTurf to endure cold climates.**

- Infill helps prevent freezing in harsh temperatures
- Withstands heavy snow fall without becoming brittle or frayed
- Water easily drains as snow melts

# MAKE IT YOURS

## Colored artificial grass creates an opportunity for a truly unique play experience.

Colored artificial grass is highly adaptable to nearly any existing surface. It can be laid over any exterior surface and adhered to almost any surface shape or type. This flexibility removes all previous limitations placed on playground design and function.

- Use multiple artificial grass colors to break up space
- Create patterns or whimsical walkways
- Use different artificial grass types to vary texture and height
- Blend your play areas in with their surroundings or make them “pop” against the natural background

### Wide Variety of Colors Available

# TESTING AND INNOVATION FOR LASTING PROTECTION

## LEED

FieldTurf products can assist project teams in earning LEED points in the following categories:

1. Maximize open space
2. Rainwater management
3. Outdoor water use reduction
4. Building Product disclosure & Optimization
  - Product declarations
  - Raw materials
  - Ingredients

## ASTM/Tests

We have met and exceeded ASTM testing for playground surfacing

1. HIC- and CFH-related products
2. IPEMA-certified products
3. Permeability testing
4. Yarn tests
5. Infill analysis

## ADA

From commercial common areas to playgrounds and multi-use fields, FieldTurf conforms to ADA requirements and is approved by the ADA for use in all applications:

1. Wheelchair accessibility by product
2. Wheelchair accessibility with and without infill
